Well water in Monroe County, Indiana

Risk Unknown Too few health tests to rate. Based on a USGS estimate. Confidence: Low. Top concerns: Coliform Bacteria, Nitrate.

What tests found

SUBSTANCE	TESTED	OVER THE LIMIT	RISK
Health concerns			
Nitrate	USGS estimate	about 0.6 of 10 parts per million	Low risk
Arsenic	USGS estimate	about 1% chance	Low risk

Tested in too few wells to rate: Lead, Iron, Sodium, Chloride, Sulfate, Mercury. The county page has every result.

What this means

There are not enough tests here to say which problems are common. Germs and nitrate have no taste or smell, so test for them every year.

What to test for

Test for bacteria and nitrate every year.

Only a test can tell you what is in your own well. A well next door can be different.

Where to get a test

Certified labs near Monroe County:

- BBP Water Corp, Spencer · 812-829-2283 · about 15 miles
- Mold Diagnostics, Monrovia · 317-996-4414 · about 29 miles

Local help

Monroe County Health Department · 812-349-2543

Indiana has no statewide rule for testing private wells, even when a home is sold. The state health department recommends testing at least once a year.
