Well water in Vermillion County, Indiana

Test for Arsenic

Moderate Risk Some wells here exceed a health limit. Based on a USGS estimate. Confidence: Low. Top concerns: Arsenic.

What tests found

SUBSTANCE	TESTED	OVER THE LIMIT	RISK
Health concerns			
Arsenic	USGS estimate	about 18% chance	**Moderate risk**

Low risk here: Nitrate.

Tested in too few wells to rate: Lead, Iron, Sodium, Chloride, Sulfate, Mercury. The county page has every result.

What this means

Arsenic: Drinking water with arsenic for many years can cause skin problems and raises the risk of some cancers, including skin, bladder and lung cancer. A reverse osmosis filter at the kitchen tap, or a whole-house arsenic filter, can remove it.

What to test for

Make sure the test covers arsenic. Test for bacteria and nitrate every year.

Only a test can tell you what is in your own well. A well next door can be different.

Where to get a test

Certified labs near Vermillion County:

- Montgomery CHD Microbiology Laboratory, Crawfordville · 765-361-4130 · about 32 miles
- McCoy & McCoy Laboratories, a Pace Analytical Services Company, Farmersburg · 812-696-5076 · about 42 miles

Local help

Vermillion County Health Department · 765-832-3622
