

Stokes County has a lower-risk groundwater profile. Lead is detected in ~50% of wells, driven by infrastructure sources. Contamination is often invisible — testing is the only way to confirm your well's safety.

YOUR TOP WATER QUALITY RISKS

CONTAMINANT	HOW COMMON	RISK LEVEL	SOURCE & CONTEXT
Lead	~50% of wells	Low-Moderate	Infrastructure — Older well casing materials and household plumbing
Chloride*	~100% of wells	Low-Moderate	Road/Geological — Road salt application and natural mineral deposits
Sulfate*	~96% of wells	Low-Moderate	Geological — Natural dissolution from gypsum and sulfate minerals
Iron*	~80% of wells	Low-Moderate	Geological — Common in glacial and alluvial aquifers; staining and taste
Fluoride	~50% of wells	Low-Moderate	Geological — Naturally elevated in some deep or volcanic aquifers

* Secondary standard — an aesthetic limit for taste, odor, or staining. Not a health-based EPA limit.

WHAT TO DO NEXT

- Order a water test.**
Test for Lead, Chloride, Sulfate, Iron, coliform bacteria. Bacteria annually; others every 3–5 years.
- Get your free county report.**
See full data, treatment options, and certified labs at <https://yourwaterreport.com/states/nc/stokes-county/>
- Upload your lab results.**
We'll interpret them, flag anything above limits, and recommend next steps — free.

KNOW YOUR WELL

Well age / year drilled _____

Last water test date _____

Treatment systems installed _____

Well driller / service contact _____

WHAT YOUR RESULTS MEAN

Use this to interpret your lab report — match the contaminant to your result.

IF YOUR TEST SHOWS	WHAT IT MEANS	CONSIDER
Bacteria detected	Immediate concern	Shock chlorination; add UV system
Lead > 15 µg/L	EPA action level exceeded	RO filter; inspect well casing
Iron > 0.3 mg/L	Staining, taste — aesthetic issue	Oxidizing iron filter
Fluoride > 4 mg/L	EPA limit exceeded — skeletal risk	RO filter or activated alumina

WHO SHOULD USE THIS

- Homeowners on private wells — not covered by public water testing
- Home buyers doing due diligence before closing
- Families with infants, elderly, or immunocompromised members
- Anyone who hasn't tested their well in the past 3 years
